

062 RW How to remove an SSL CSR and certificate

PRODUCTS: RW

SYMPTOMS: If an SSL certificate has been installed on the RoomWizard and you wish to remove it so that the unit can be accessed via http protocol (port 80) rather than requiring https protocol (port 443), follow this procedure to remove the certificate.

OS's:

KEYWORDS:

RESOLUTION:

The RoomWizard firmware contains a script (*/opt/sbin/cleanup/removecsr.sh*) which one may execute to remove the installed SSL certificate and get back to http mode.

- Log into the RoomWizard as root via SSH and enter the following commands:

```
sh /opt/sbin/cleanup/removecsr.sh
```

- Unit will reboot the internal server and will be accessible via http protocol after rebooting.
