RoomWizard II

RoomWizard Admin Console 1.6

07/17/2019

OVERVIEW

This document contains release notes for RoomWizard Admin Console 1.6. Steelcase is consistently working on maintaining and supporting RoomWizard. This release focuses on a security updates, usability features and support of firmware updates.

WHAT'S NEW IN 1.6?

- Improvement of the handling and security of confidential information
- Improved protection for the RWAC application password
- Improved RoomWizard firmware update procedure to prevent duplicate upgrades from occurring on the same device
- When entering a new application password in the options dialogue you are required to retype the password for accuracy
- Idle timeout
  - Users are required to re-input application password after 15 minutes of inactivity
- Changes to browser feature
- Support for 4.9 RoomWizard Firmware Release
  - Expanded SNMP security options
  - Ability to hide the web address on RoomWizard front panel to address personally identifiable information concerns
  - RoomWizard password complexity rules are now enforced
  - Users are now informed via email and visual cues of RoomWizard password status changes and expiration
- The RoomWizard list starts in a collapsed form
- RoomWizard list status updates are now quicker
- A new hover-over feature has been added to inform users about aspects of individual RoomWizards. If hovering over a group or subgroup the status will reflect the RoomWizards in the group
- RoomWizard status now propagates to the group or subgroup it is assigned to so users can quickly see where issues might exist
- Users now have the option to background the search for new RoomWizard units on the user configurable subnet list
- When making changes to the sync configuration on a RoomWizard the room ID will be prepopulated if already available to RWAC
- Admin password expiration configuration. User will now be able to configure length of time before admin password expiration with firmware 4.10 or later
- Multi-CA Cert support in 802.1x
- RoomWizard will not reboot if the admin password is the only change in Partial Configuration

HOW TO UPDATE TO 1.6?
